Not for Resale

We, the management of **Ovation Audio/Video Specialists**, have been in the consumer electronics business for close to twenty years. We were all part of an organization that was named one of the top ten audio dealers in the U. S. for eight consecutive years. At **Ovation** we strive not only to sell the best equipment possible in each price range, but also to give you the best service possible, whether we're repairing a unit for you or installing new equipment in your home or automobile. This catalog contains a representative sample of the fine products we carry. There are many specials listed, and in addition, we have a number of unadvertised in-store specials. So hurry in for the best selection before other holiday shoppers beat you to the punch.

One thing often forgotten in the excitement about new equipment is how to fit it into the aesthetics of one's home. We are pleased to offer **Custom Woodwork and Design** to our customers. These are very high quality natural wood cabinets that can be assembled using a building block approach. You can buy one now and add on indefinitely as the picture shows. The cabinets are designed for a very high degree of functionality and offer great value compared to those available in quality furniture stores.

HANDSOME
CWD
FINISHES

NATURAL OAK

DARK OAK

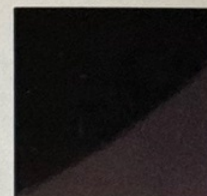

NATURAL WALNUT

BLACK OAK

HIGH GLOSS BLACK

Fineline is a division of CWD, Inc. It comes in two finishes: Protec medium oak and satin black oak. Both feature genuine oak veneers with protective coatings that are impervious to all household spills and stains. It is priced slightly less than CWD since it uses all veneers, instead of some solids.

Fineline Monitor Cart • designed to hold TVs up to 30" wide plus a VCR and one other component. Glass doors included. list \$260
NOW ONLY \$229.95

Fineline 42" tall Audio Module • will house an elaborate audio system. Includes one fixed and two adjustable shelves. Also includes concealed casters and glass doors. In oak veneer, list \$300
NOW ONLY \$259.95

CWD®
CUSTOM WOODWORK & DESIGN

CWD 4203 • This 42" high cabinet will house a variety of audio & video components. It features solid oak side panels & optional glass or wood doors are available. Optional drawers for compact disc or cassette storage are also available. **\$379.95 oak**

CWD Monitor Cart • This unit will easily accommodate up to a 27" diagonal TV, a VCR, and optional videotape drawer. Doors are optional. **\$275.00 oak**

ADVANCES ALONG THE WAY 1910

Denon's parent company founded as Japan Gramophone. This is Japan's very first audio company and first record company.

1938

Now called Nippon Columbia, the parent company establishes the Denon professional audio brand.

1939

The world's first electric drive turntable is created by Denon.

1951

Denon introduces the world's first moving coil cartridge.

1953

Denon's first tape recorder is introduced. It's built for the broadcast industry.

1954

Denon begins production of recording tape.

1963

Denon introduces the classic DL-103 moving coil cartridge, still being made after 26 years.

1970

Denon starts work on PCM digital audio recorders with NHK.

1972

Denon introduces the world's first digital recorder good enough for commercial record production, the legendary Denon DN-023R.

1975

Denon announces test production of optically-read PCM digital audio discs.

1982

Denon introduces Compact Discs and CD players.

1986

Denon's DCD-1500 becomes the first CD Player awarded five stars by Digital Audio.

1987

Denon opens its second CD pressing plant in Madison, Georgia. DENON's DN-950F, the world's first CD Cart Player, is destined to make CDs as common as carts in radio broadcasting.

DENON

Denon DRA 325 • This fine receiver is the remote control center for an extensive Denon system. Like all Denon receivers it features discrete output transistors, not cheap IC power packs. This allows the amplifier to put out much more real world musical power. Conservatively rated at 40 watts per channel, it offers remote control of Denon cassette decks & CD players, digital tuning with 16 station presets, variable loudness equalization and more. **\$349.95**

Denon DRA-425 • This unit has all the features of the DRA 325 plus a 50Wx2 amp with high speed, high power transistors, a liquid-cooled heat sink, powerful remote control w/ volume adjustment, AM/FM tuning, cassette, and CD control. **\$450.00**

Denon AVC 2000 • A true audio/video amp with 5 channels of amplification (75 W/ch front, 20 watt center channel, 20 W/ch rear). Comes with smart remote, Dolby Pro-Logic Surround Sound & enough switching for multiple VCRs, TVs, and audio components. Includes 2 S-video inputs. **\$999.95**

Denon DRA-1025A • State of the art AM/FM stereo receiver with Denon optical Class A circuit, which eliminates any traces of switching and crossover distortion, one video and two VCR input/output terminals, programable smart remote, and a clean and powerful 125 watts per channel. **\$999.95**

Denon PMA 520 • This integrated amplifier is rated at 70 watts per channel and uses a pure current supply to decrease dynamic IM distortion by 60 dB, seven sets of audio inputs, CD direct switch, extra large speaker terminals, wide range super equalizer, and optical Class A circuitry to eliminate any traces of switching and crossover distortion. **\$350.00**

Denon TU 460 • Extremely sensitive AM/FM stereo tuner with 16 station presets has MPX noise reduction switch for receiving weak FM stations. **\$239.95**

**Williston

CD PLAYERS

Denon DCD 520 • NEW! Denon CD sound quality at an alltime low price! 4X oversampling, dual channel super linear converters, wireless remote, auto-space and random play. **NOW ONLY \$249.95**

Denon DCD 620 • NEW! CD with dual hand tuned super linear converters, 20-bit digital filter with 8X oversampling, wireless remote, and all other features of DCD 520. **NOW ONLY \$299.95**

Denon DCD 820 • This affordable CD player incorporates not only a dedicated super linear converter for each channel, but it also features a 20 bit Delta digital filter with 8X oversampling, digital outputs, and noise shaper circuitry. Includes volume control on the remote. **\$399.95**

Denon DCD 920 • This CD player features a dedicated 20-bit super linear converter for each channel, plus a 20 bit digital filter with 8X oversampling, optical digital output, and noise shaper circuitry. Includes rotary volume control on the remote. **\$499.95**

Denon DCM 555 MK II • Compact disc changer offers continuous playback of 6 CDs for hours of listening enjoyment. 32 selection program play, full random play, disc sequential random play, 4X oversampling digital filter, dual super linear converters and wireless remote control. **\$550.00**

Denon DCD 1520- This CD player is the successor to the legendary 1500 series. It features dual 20 bit super linear converters with MSB (most significant bit) adjustment, 8X oversampling, 20 bit proprietary digital filter, optical digital outputs, and wireless remote with volume adjustment. **\$750.00**

CASSETTE DECKS

Denon DRM 400 • NEW! cassette deck with Dolby B&C, fine bias adjust, MPX filter, full-logic transport, and compatibility with Denon system remote receivers. **\$229.95**

Denon DRM 500 • quality cassette deck. has high precision transport mechanism, Dolby® B&C, HxPro, bias adjustment, music search and uncompromising Denon sound quality. **\$275.00**

Denon DRM 700- Outstanding 3-head cassette deck uses computer controlled dual capstan drive and silent mechanism. Dolby® B&C, Dolby® HX Pro, MPX filter switch, manual bias adjustment, and versatile wireless remote control. **\$399.95**

Denon DRW 750 • double cassette deck with Dolby® B&C, HxPro, 2-speed dubbing, relay play, music search, bias adjustment, system remote compatibility and more. **\$399.95**

TURNTABLES

Denon DP 7- This fully automatic direct drive turntable offers high performance with ease of operation. Denon's exclusive magnetic pulse speed detection system has been combined with a PLL quartz-control and a servo-controlled tonearm. A great turntable for a modest investment. **\$199.95**

LUXMAN
Technology Perfected

Every home audio company has their own area of expertise. Some manufacturers concentrate on new inventions and patents. Others focus their efforts on reducing costs and producing lower priced components.

More important than being the first or the cheapest, Luxman components are designed to achieve their sonic best. The engineers at Luxman have dedicated a lifetime to perfecting existing technology for sonic superiority.

Since 1925, Luxman has been a leading manufacturer of components which retain true musicality- no small feat in today's world of digital recordings and transistors.

Luxman offers a full 5-year parts and labor warranty on all their equipment, thus enhancing their products' value even further.

Luxman R 115- This receiver is conservatively rated at 70 watts/channel, with dynamic power capabilities of 200 watts/channel. It features digital tuning with 20 presets, auto-seek, AM/FM memory scan, CD direct switch and a multi-function remote control. It can be used as the centerpiece of a multi-room remote control home installation. **\$850.00**

Luxman R 117 • This is the flagship of the new Luxman "Ultimate Power" receiver group, combining musical purity and warmth with the high dynamic power needed to ensure total sonic integrity with digital source material. Similar in features to the R-115, but much more powerful. Nominally rated at 160 watts per channel, this amp can deliver 700 watts per channel into 2 ohm loads for short periods. **\$1200.00**

Luxman K 111 • This popularly priced cassette deck offers Dolby B&C noise reduction, Dolby® HX-Pro, HEXALAM record/play head, two-motor drive system for exceptionally low wow & flutter, feather touch full logic transport controls, and compatibility with Luxman's full system remotes. **\$379.95**

Luxman K 110W • Luxman's first dual well tape deck incorporates a double autoreverse transport, high speed duplicating, Dolby B&C noise reduction plus Dolby HX Pro, which increases high frequency headroom extension for better sound. **\$579.95**

Luxman TP-117 • A tuner/preamplifier system remote control center. This unit along with remote eyes and/or volume controls will allow you to control your Luxman system from as many as 10 different rooms, plus listen to two different sources in different rooms simultaneously. **\$1249.95**

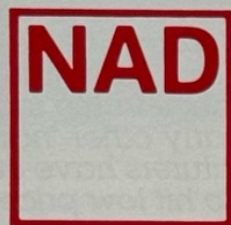

Luxman DZ 111 • This unit brings the musicality of Luxman compact disc players to a new level of affordability. A unique ALPS laser pick-up is combined with dual D/A converters and a 4X oversampling digital filter for superb sonic accuracy. The D 111 also includes full function remote control capability. **\$349.95**

Luxman DC 113 CD Changer • Six-disc changer plus single tray features 8X oversampling, dual D/A converters, direct digital output, an all-metal housing, multi-room remote capability, and is the first changer to include a five year parts and labor warranty. **\$679.95**

NAD 2600A • This power amp establishes a new standard for long-term dynamic headroom. Although the 2600A is conservatively rated at 150 watts, due to its unique power envelope circuitry, it is capable of 700 watts per channel, and in the case of very low speaker impedances, as much as a kilowatt on clean musical peaks! Clearly one of the best of today's new generation of power amplifiers. **\$799.95**

AN UNCOMMON COMPANY.

NAD is the world's leading manufacturer of affordable high quality stereo equipment. Since 1972, NAD stereo components have won universal praise for their sophisticated engineering, excellent sound, ease of use, and superior price/performance value. NAD products are sold by a carefully selected network of dealers in over thirty countries around the world. If you haven't seen the name before, it is because NAD invests most of its money in engineering rather than advertising. No compromises whatsoever are made in the design areas which directly affect performance in real-use conditions.

NAD 7000 Receiver • This new model is the entry level unit in the Monitor Series lineup, which culminates in the 7600, which sells for \$1699. This model combines the convenience of remote control with NAD's Power Envelope technology. While rated at 40 W RMS, this product is capable of delivering **200 watts** of clean dynamic power. **\$549.95**

NAD 7240 • This receiver is rated at 40 watts per channel of steady state power and its tone-burst power for musical sound exceeds 200 watts per channel at 4 or 2 ohms. It features digital ready inputs with a dynamic range greater than 100dB, preserving the transparent clarity of the finest analog and digital recordings. Bass EQ provides solid, subwoofer-like bass while an infrasonic filter prevents excessive woofer-cone motion and minimizes rumble and acoustic feedback. It features an advanced digital tuning section which needs only half as much signal strength to obtain good quieting. **\$449.95**

NAD 1240 • Stereo preamplifier offers great performance at a reasonable price. It has six input connections: CD and video inputs, MM & MC phono input, tuner, and two auxiliary inputs. It also offers a bass equalization circuit and infrasonic filter, low level audio muting and a high current headphone amp. **\$249.95**

NAD 5325 • This programmable compact disc player features 4X oversampling, 18-bit digital filter, wireless remote control and more. It is hand tuned for low level linearity and is sonically superior to its predecessor for \$100 less! A real price/performance value. **\$299.95**

NAD 5170 • Audiophile multi CD player has a six disc magazine plus single-disc tray; it allows programming of 32 tracks from any or all of the 7 discs plus random play. 4X oversampling and a D/A converter whose most significant bit transition is individually hand-tuned to achieve the lowest distortion and best linearity possible. **\$699.95**

NAD 1700 • This preamplifier/tuner combo offers the same NAD quality of separates without the added cost of a second metal chassis. It offers a high performance preamp section and a highly sensitive tuner plus a wireless remote control that operates a motor driven volume control and all other functions. **\$799.95**

NAD 6325 • cassette deck with Dolby® B&C noise reduction, a circuit which optimizes recording for mobile environments, play trim, full-logic transport and more. **\$249.95**

KENWOOD

RECEIVERS

KR-V9010 • powerful Audio-Video receiver has 130 watts per channel, 160 function programmable remote control, S-VHS (Y/C separate) input/output, 4 video inputs, video dubbing with audio injection, video through dubbing, Dolby Pro-Logic surround with Normal/Wide/Phantom mode, center-channel and rear preouts, Theater/Hall surround, adjustable digital delay, 7-band graphic equalizer with 10 presets, 7-band spectrum analyzer, on-screen display capability, built-in 20-watt per channel rear speaker amplifier. list \$850 **NOW ONLY \$699.95**

KR-A4010 • entry-level receiver has 45 watts per channel, digital tuning with 20-station random preset memory, electronic input selectors, video sound and CD/AUX inputs and more. list \$250 **NOW ONLY \$199.95**

KR-A5010 • all the features of the A4010 plus: 60 watts per channel, 5-band graphic equalizer, 10-key direct frequency input, remote control, two video inputs. list \$300 **NOW ONLY \$269.95**

KR-V6010 • this Audio-Video receiver has all the features of the A5010 plus: 70 watts per channel, video through dubbing, Dolby® surround, 5 watt per channel rear speaker amplifier. list \$400 **NOW ONLY \$329.95**

Kenwood has been offering quality stereo equipment in the U.S. since the 1960s. Many servicemen became familiar with the product overseas under the name "Trio", but the product is now known as Kenwood world-wide. We have found Kenwood offers one of the best combinations of value and performance in the industry. While many other "name" manufacturers have cut corners to hit low price points, Kenwood has opted to build all its products to a definite standard quality level.

CASSETTE DECKS

KX-3510 • auto-reverse cassette deck with Dolby HX-Pro headroom extension, automatic bias adjustment, direct 16-program search system, index scan, blank search, re-recording standby, automatic tape selector, system remote controllable. list \$300 **NOW ONLY \$229.95**

KX-W6010 • double auto-reverse cassette deck with one Rec/Play and one Play mechanism has all the standard features plus: high speed dubbing, Dolby B&C, relay play, timer recording capability. list \$330 **NOW ONLY \$269.95**

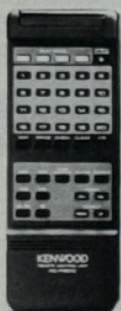

KX-W8010 • all the features of the KX-W6010 plus: Dolby HX-Pro headroom extension, dual Bi-Directional recording/playback, digital readout tape counter, fluoroscan meters. list \$430 **NOW ONLY \$349.95**

CD PLAYERS

DP-2010 • CD player with DPAC-digital pulse axis control, 16-bit linear dual D/A converters, 4X oversampling, full-function wireless remote control, random play, headphone output, system remote controllable. list \$279.95 **NOW ONLY \$199.95**

DP-M4010 • multiple compact disc player uses a 6-disc magazine and has the same quality sound of the DP-2010. Includes wireless remote control and system remote compatibility. A fluorescent display with music calendar and disc indicator keeps you informed. list \$350 **NOW ONLY \$299.95**

DP-M6010 • this multiple CD player has all the features of the DP-M4010 and adds a single-disc drawer, 8X oversampling, computerized CD edit function, and one-touch disc selection. list \$450 **NOW ONLY \$399.95**

DP-48 • entry-level compact disc player with 3-beam laser pickup, 4X oversampling digital filter, 16-bit dual D/A converters, 20-track random program memory, timer playback capability, and a fluorescent display. list \$200 **NOW ONLY \$169.95**

TURNTABLES

KD-48F • fully-automatic belt-drive turntable is system remote controllable and comes with T4P cartridge. list \$120 **NOW ONLY \$99.95**

Yamaha has been deeply involved in all aspects of music production and reproduction for more than a century. As a maker of professional musical instruments, from concert grand pianos to electronic keyboards, Yamaha has developed a deservedly high reputation for impeccable craftsmanship. This tradition of excellence is continued in Yamaha audio components. Recognized worldwide as a major innovator in the audio field, Yamaha produces a wide range of epoch-making analog and digital equipment for both home and professional use.

CD PLAYERS

Yamaha CDX 520 • This CD player features remote control, dual high speed 16-bit D/A converters, and an 18-bit 8X oversampling digital filter.
list \$330 **NOW ONLY \$299.95**

RECEIVERS

Yamaha RX 330 • Digital receiver is conservatively rated at 40 watts/channel, has 16 station presets, dynamic bass extension, continuously variable loudness contour and A/B speaker selectors. **\$299.95**

Yamaha RX 530 • This high output receiver has a high dynamic power amp rated at 50 watts per channel, digital tuning with 16 station presets, CD direct switch, continuously variable loudness control, dynamic bass extension, and system remote with motor-driven volume control. **\$399.95**

Yamaha RX 830 • This receiver builds on the fine characteristics of the RX 530 and adds a learning-capable remote control, 2 video/6 audio inputs, high output 70 watt/ch. amp, 3-mode surround with Dolby Surround, 4-channel driver, rear level control, and more. **\$599.95**

Yamaha CDX 720 • CD player with dual high speed 18-bit D/A converters, 18-bit 8X oversampling digital filter, optical/coaxial digital output, wireless remote control, and more. **\$429.95**

Yamaha CDC 500 • CD changer holds 6 discs in a magazine and has a single disc tray for continuous playback. It features 4X oversampling digital filter, digital coaxial output, direct track/disc access, 32-track random access programmable playback, CD single compatibility (1-disc tray only), wireless remote, and more. **\$499.95**

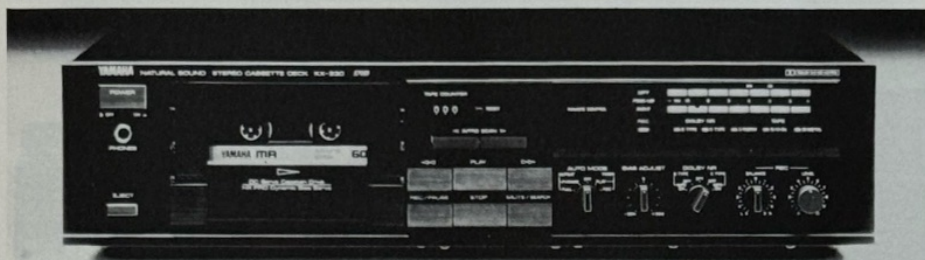

Yamaha CDC 610 • Automatic CD changer uses 10-disc magazines for convenient operation. 18-bit quadruple oversampling digital filter, high-speed D/A converter, 36-track programmable playback, 3-beam laser pickup and wireless remote control make this a popular choice. **\$599.95**

CASSETTES

Yamaha KX 130 • entry level cassette deck with hard permalloy head, full logic control, Dolby B&C, auto tape selector, auto record mute, and record return. list \$220
NOW ONLY \$199.95

YAMAHA

Yamaha KX-230 • this cassette deck gives uncompromising sound and ease of operation, at an affordable price. It offers Dolby B&C, Dolby HX-Pro dynamic bias servo, hard permalloy heads, 2-motor tape transport, manual bias adjustment, multiplex filter switch, music search, bi-directional intro-scan, full repeat and phrase repeat play, and Yamaha system remote compatibility. **\$269.95**

Yamaha KX-R430 • this quality auto-reverse cassette deck builds on the fine qualities of the KX-230. It adds an amorphous record/playback head and its own remote control as well as Yamaha system remote compatibility. **\$349.95**

Yamaha KX-W302 • auto-reverse double cassette deck features Dolby® B&C, HX Pro, two-speed dubbing, amorphous R/P heads, relay play, auto tape selector, music search, MPX filter and timer record and play. **\$449.95**

Yamaha KX-W900 • twin auto-reverse deck offer record and play on both sides, simultaneous independent recording, full auto, skip, random program, and manual dubbing, along with high/normal speed and cross-Dolby® dubbing. Dolby® B&C, Dolby® HX Pro, super bias, random program play, and a 44-key wireless remote control make this an ideal deck even for the audiophile. **\$699.95**

SYSTEM REMOTE CONTROL

Yamaha MRX 100 • MEMORY MAX • learning capable multifunction remote control unit controls all audio/video components. It includes 97 function keys and 3 multi-command keys which operate up to 15 controls, flip panel with dual-function keys, twin rocker type keys, simple and quick programming, and a variety of labels for a wide array of applications. **\$119.95**

TURNTABLES

Yamaha TT 300- Quality belt-drive semi-automatic turntable with straight tonearm design, resonance absorbing turntable mat and disc-clamper EP adaptor, all in a sleek, low-profile design. **\$159.95**

CARVER

Carver Silver Seven-t • Simultaneous High Current/High Voltage Monoblock Reference Magnetic Field Power Amplifier is conservatively rated at 575 watts into 8 ohms, 900 watts into 4 ohms, and 1000 watts onto 2 ohms. Unique design with easy-to-read analog power meter, this amp is the most powerful available for home use. The Silver Seven-t duplicates the sound of Carver's \$17,500 tube amplifier. **\$1999.95 pair**

Carver TFM-25 • New more efficient Magnetic Field power amplifier is conservatively rated at 225 watts RMS/channel into 8 ohms, 350 watts RMS/channel into 4 ohms and 700 watts/ch for musical peaks. Famous Silver Seven t-mod design with lighted analog power meters. **\$649.95**

Carver CT-17 • Remote control preamplifier/tuner with Dolby Pro Logic® 5-channel surround sound processor, Sonic Holography® generator, Asymmetrical Charge-coupled FM Detector, 20 FM/AM presets, 7 audio inputs (CD direct & 2 video), Hall and stadium effects synthesis, 3-way tone controls, dual tape monitors, high cut filter, integrated remote control with separate input/record selector and extra remote volume control for room-to-room capability. This unit can provide you with video sound that surpasses the finest theaters. **\$799.95**

Magnetic Field Power Amplifier Technology

Quite simply, Carver power amplifiers deliver more current, more power and more voltage than competitively-priced designs. They also deal with the true realities of overall speaker impedance. While many amplifier designs claim "low impedance capability" their output voltage or current suffer in the process—all three specifications are linked by basic laws of physics. Carver Magnetic Field Amplifiers are capable of delivering both high voltage and high current simultaneously into the wide impedance range which typifies today's top loudspeaker designs. The key is Carver's patented power supply system, a fully regulated design of a type normally used only in esoteric aerospace electronic instrumentation. It can access more of each AC line voltage cycle and is able to draw 200% MORE CURRENT than conventional designs. With dynamic switching between three power "trails" depending on demand, and a distributed capacitance system which is able to achieve more joules of energy storage than traditional "soup cans", Carver Magnetic Field amplifiers can deliver up to 500% MORE CURRENT during musical peaks into a wide range of both resistive and reactive speaker loads.

Carver HR-752 • Remote control Sonic Holography® Receiver uses magnetic field power amplification, and is conservatively rated at 100 watts/channel RMS into 8 ohms. It features 5 audio inputs, Sonic Hologram Generator, Asymmetrical Charge-Coupled FM Detection circuit, 20 FM/AM presets, preset scan and auto/manual tuning, motorized volume control, 3-band tone controls, matrix surround sound synthesizer, dual tape monitors with dubbing, and pre/main outputs. **\$699.95**

Carver C-11 • Preamplifier employs Carver's new precognition Sonic Holography to enhance all of your favorite CDs, records, and tapes. Video sound takes on incredible drama. This is an audiophile quality preamp with abundant inputs and switching capabilities. **\$579.95**

Digital Time Lens Technology

A significant portion of analog-to-digital (MD) compact disc releases exhibit audible differences when compared with well mastered analog versions of the same recording. For various technical reasons, MD discs often have 1) overall octave-to-octave energy balance shifted towards more midrange above 4 kHz, 2) a significant reduction in the amount of L-R signal which provides crucial spatial information. Bob Carver's Digital Time Lens circuitry restores both the spectral balance originally intended by the musician and recording engineer while restoring ambient effects. The result is a warmer, more natural sound that places you in the same space with performers.

Carver TL 3100 • Compact disc player with 16-bit/4X oversampling, dual D/A converters, Digital Time Lens sound enhancement circuitry, 22-track programming, full-function random access remote control, and remote compatibility with Carver receivers. **\$349.95**

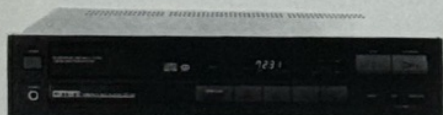

vector research

Vector Research VRX 3600 • Full remote control 40 watt receiver uses discrete output transistors for plenty of power, digital tuner with 16 station presets, CD and video inputs, and more. list \$330 **NOW ONLY \$279.95**

Vector Research Carrera CR 2530 • This quality receiver has a 30Wx2 amplifier with discrete output transistors, a new improved digital tuner with 16 station presets. list \$230 **NOW ONLY \$169.95**

Vector Research Carrera CD 3200 • Oversampling CD player has 3-beam laser pickup, audible search, 2-way repeat, multi-function display, running and remaining time indication. list \$200 **NOW ONLY \$149.95**

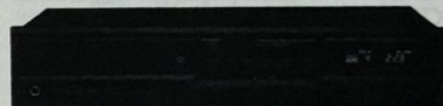

Vector Research Carrera CR 2300 • This modestly priced receiver offers solid performance with many features you would expect to find only on more expensive units. High output 25 watt per channel amp, CD and video inputs, 2 sets of speaker terminals. list \$160 **NOW ONLY \$125.00**

Vector Research Carrerra CX 3250 • This affordable double cassette deck features 2-speed dubbing, synchro start dubbing, continuous play, power assist decks, microphone inputs, manual dubbing/recording level, metal tape capability, and Dolby® B noise reduction. An incredible price/performance value. list \$150 **NOW ONLY \$129.95**

Vector Research is an American based company that designs its equipment to offer audiophile sound at very competitive prices. Their equipment features easy to use front panel controls along with close tolerance high quality discrete components.

Vector Research VCD 410 • A quality low priced compact disc player that offers a 3-beam laser pickup, 8X oversampling digital filter, and wireless remote control. list \$300 **NOW ONLY \$219.95**

Vector Research VT 155 • another outstanding value! This belt-drive semi-automatic turntable has a high torque 4-pole synchronous motor and a damping belt for accuracy you would expect only on more expensive models. Convenient front panel controls. list \$100 **NOW ONLY \$79.95**

Not for Resale

Polk Audio has achieved its leadership position in the loudspeaker industry by totally dedicating itself to superiority in product, value, and service to its customers. Polk speakers have been favorably reviewed in both the stereo buff magazines and the general press. For example, *BUSINESS WEEK* said, "Polk Audio makes loudspeakers that audiophiles crave as much for their sound quality as their affordability. The speakers have won respect because of their ability to accurately reproduce complex musical passages." But don't take our word or anyone else's for Polk's performance - come in and listen - we think you'll like what you hear.

pictured left to right are: Monitor 10B, Monitor 5jr+, Monitor 4A, Monitor 7C, Monitor 4.5, Monitor 5B

POLK MONITOR STANDS

Polkstand III • for Polk Monitor 7 & 10, this stand is 9" tall and features spiked feet to improve performance. **\$64.95 pair**

Polkstand V • for the medium-sized monitors, this stand is 15" tall. **\$49.95 pair**

Polkstand IV • for the small monitors, this stand is 25" tall. **\$49.95 pair**

Polk Monitor 4a • This compact bookshelf speaker uses a 6 1/2" bass-midrange driver and a 1" polymer dome tweeter for outstanding bass and imaging from a speaker this size. 10 - 80 watts/channel **\$99.95 each**

Polk Monitor 5jr+ • This small speaker uses a silver coil dome tweeter, a 6 1/2" bass-midrange driver, and a fluid coupled subwoofer. 10 - 100 watts/channel **\$174.95 each**

Polk Monitor 5B • Bookshelf speaker uses a larger cabinet, a silver coil dome tweeter, a 6 1/2" bass-midrange driver and a fluid coupled subwoofer, for outstanding full range performance. **\$224.95 each**

Polk Monitor 7C • Quality 3-way speaker uses a silver coil dome tweeter, a 6 1/2" bass-midrange driver and a 10" fluid coupled subwoofer for extended bass performance. Can be shelf mounted or placed on stands. 10 - 150 watts/channel. **\$289.95 each**

Polk Monitor 10B • One silver coil dome tweeter, two 6 1/2" bass-midrange drivers and a 10" fluid coupled subwoofer make for a great sounding speaker. Up to 200 watts/channel **\$369.95 each**

The Speaker Specialists®

Polk's top of the line speakers incorporate Matthew Polk's proprietary and patented loudspeaker technology – Stereo Dimensional Array (SDA). The technology was created to overcome the problem of interaural crosstalk – the left ear receives not only the left channel signal, but also the right channel signal, and vice versa. The extra sound heard by each ear from the opposite stereo channel confuses the hearing mechanism, causing the listener to perceive the sound as coming from the speakers themselves, rather than from a soundstage as in a live concert. Polk's SDA technology cancels out the unwanted interaural crosstalk sounds. The listener experiences the illusion of being surrounded by a three-dimensional soundstage, unconstrained by the positions of the loudspeakers themselves.

Polk SDA 2B - Sophisticated tower design speaker uses the heralded Stereo Dimensional Array technology for incredible three dimensional imaging. Includes two 6 1/2" woofers, one 12 subwoofer, and one silver coil dome tweeter.
\$549.95 each in black ash
\$649.95 each in natural oak

"Mindboggling... Astounding... Flabbergasting"

High Fidelity Magazine

Over two years ago, the Polk Audio Engineering staff was presented with it's stiffest challenge. They were charged with the task of developing the world's best 1 inch dome tweeter. Their objectives were:

- Set a new standard for flatness of frequency response
- Extend frequency response, free of resonant peaks, to beyond 25 kHz
- Improve high frequency dispersion
- Set new standards for clarity and detail
- Dramatically increase power handling
- Extend low frequency response to below 1.5 kHz
- Maintain phase linearity over the entire 4 octave range of the device
- Maintain the high efficiency of previous Polk tweeters

The result: High frequencies were smoother, extended and more detailed. What surprised them were the improvements in sound quality in frequencies **below** those reproduced by the tweeter. Voices and mid-range instruments were stripped of all coloration and inner detail was vastly improved. And, the speakers played at much higher volume levels. Currently the new TL 3000 tweeter is available only in the SRS 1.2 & 2.3 models. Stop in and listen - you'll be amazed.

Polk SDA SRS 1.2 tl • Polk's finest! → Signature Reference System loudspeakers use phase coherent focused line source multiple driver technology. Four silver coil dome tweeters, eight bass-midrange drivers and a 15" planar fluid coupled subwoofer handle up to 1000 watts per channel. These speakers will satisfy the most critical ear.
\$1699.95 each

Polk RTA 11t • is the finest conventional (non-SDA) speaker that Polk Audio manufactures. Its extremely high power handling (250 watts) and high efficiency (90dB) provide remarkable dynamic range from both large and small amplifiers. The RTA 11t utilizes the same technologically advanced fluid-coupled subwoofer design found in Polk's flagship model. Dual 8" sub-bass radiators are coupled to two 6 1/2" mid/bass drivers, resulting in a fast, powerful, deep, and ultra-accurate bass response, without the boomy, undetailed sound of large woofer systems.
\$474.95 each

Speakers are the most important part of a great music system. The quality of sound you hear is determined most critically by this component of the system. Nothing in the way of gadgetry or sophistication can overcome poor speaker performance, but outstanding speakers can make mediocre equipment sound good. At Ovation, we have the finest collection of speakers in town! Whether you're looking for the most advanced speaker systems available, or just a good speaker at a good price, we have a speaker for you.

DAHLQUIST

- founded February 1, 1973 by Jon Dahlquist and Saul Marantz
- introduced the model DQ-10 which became and remains a true industry reference standard
- holds many patents including:
 - pneumatic suspension loudspeaker
 - free space driver mounting
 - first dynamic speaker to address time-delay distortion, linear phase and diffraction-induced distortion simultaneously
- a design philosophy dedicated to the understanding of sound reproduction capable of bringing the concert hall to the listener through advanced loudspeaker technologies
- its goal is to develop loudspeakers that can reproduce wide sound stage passages and tightly focused three dimensional images like the human voice at the same time.
- the Dahlquist commitment to excellence is based on a chain that runs from music - through technology - to music appreciation
- The future of Dahlquist is based on further advances in technology. The current Dahlquist product line represents the outgrowth of over 15 years of research and development. The ongoing R&D performed at Dahlquist assures a bright future for Dahlquist and more importantly for its customers.

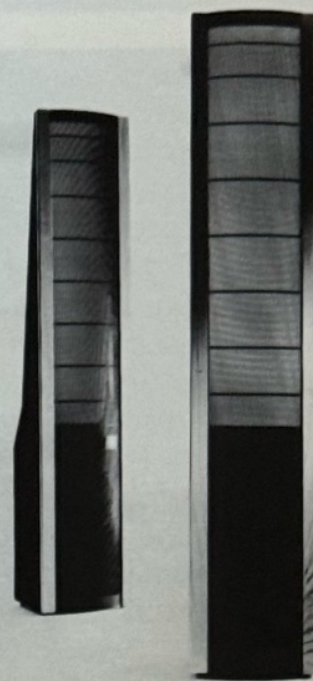

Dahlquist DQM 903- Great little bookshelf speaker has the trademark openness and depth of all Dahlquist speakers. It features the un-box enclosure which uses special bracing to minimize coloration due to enclosure excitation. **\$245.00 each** in black ash

Dahlquist DQ-12 • The newest and most reasonably priced phase array system, the DQ-12 is an improved version of the legendary DQ-10 system. As such it offers incredible imaging, coherence, and openness of sound. **\$599.95 each**

Dahlquist DQ 20- This phased array system offers remarkable openness, depth, and clarity, and has an exceptionally accurate spectral balance. The DQ 20 minimizes diffraction distortion and time-delay distortion with its unique design. This fine speaker will satisfy the most dedicated audiophile. In addition to being a fine musical instrument, the DQ 20 is a robust, rugged and reliable product backed by a 5-year limited warranty. **\$999.95 each**

Martin Logan Sequel- This is a highly sophisticated speaker which combines electrostatic technology with a 10" extended throw woofer for deep, deep bass. Electrostatic design offers seamless, transparent high and midrange reproduction, tight damping and incredible resolving power. The elegant appearance of the Sequel lives up to its astonishing performance. **\$2500.00 pair** in light oak

Martin Logan C.L.S.- This full range electrostatic transducer is the essence of electrostatic design. Award-winning Curvilinear Line Source technology allows smooth unencumbered dispersion of sound throughout the listening area. Incredible three dimensional imaging and focus are achieved with minimal room interaction for a very natural sound. **\$3500.00 pair** in light oak

MB Quart Electronics of Obrigheim, West Germany has been manufacturing high quality microphones, headphones, and speakers for more than 20 years. MB now has one of the hottest selling product lines in Europe. Their products have been highly reviewed in both the U.S. & Europe.

All MB speakers use the very highly acclaimed titanium dome tweeter. The titanium diaphragm is extremely thin, light, stiff and strong, permitting instantaneous response to musical transients. We feel that MB offers one of the highest quality products we've seen, one well worth your listening attention.

MB Quart 350 S • This column type speaker stands 32" tall and has a footprint less than 1 square foot. It features an 8" woofer with a long-throw butyl rubber surround and the 1" Titanium dome tweeter. It features high dynamic range for today's digital sources. **\$499.95 each**

MB Quart 280 • This small speaker uses a unique low-mass 8" woofer surrounded in a butyl rubber suspension for long excursions (and great bass response). A 1" titanium dome tweeter provides ultra smooth high frequency response. You'll be surprised to hear sound this good coming from a speaker this small. **\$299.95 each**

MB Quart 220 • The junior member of the MB home loudspeaker design features the same titanium dome tweeter as their most expensive systems. It also features an extra thick, internally braced cabinet which suppresses resonances more thoroughly than material found in most competing loudspeaker cabinets. **\$249.95 each**

CARVER

The Carver Silver Edition Amazing Loudspeaker • This beautiful, stately speaker employs a 48 inch full-range ribbon with a total of three 12-inch subwoofers per speaker. Your music is reproduced with power, realism and authority rarely achieved in the home. Come in to listen and receive a free CD from Carver.

\$1799.95 pair in oiled oak

SUBWOOFERS YAMAHA

Yamaha NSW-2 • A reasonably priced powered subwoofer, this 12 inch woofer features a built-in 40 watt amplifier and active crossover to really augment the bass of your current stereo system. **\$289.95**

Velodyne ULD-12 • One of the ultimate subwoofers! This 12 inch woofer features a built-in 400 watt amplifier with Velodyne's patented High Gain Servo technology. This is a system which uses motional feedback (a controller modifies the signal from the amp to the speaker so that the acoustical output from the speaker is a true representation of the input). This results in flat frequency response (to 15 Hz +/- .1 db) and extremely low total harmonic distortion. **\$1195.00**

3-PIECE SPEAKER SYSTEMS

Bose AM-5 • Bose's original 3-piece system has been a runaway best-seller since it was introduced. The subwoofer enclosure consists of two woofers arranged in a seventh order configuration, which is a design patented and exclusive to Bose. The small satellite speakers each consist of two midrange/treble drivers with a swivel top to adjust the sound for maximum performance in your listening room.

\$749.95 system

Bose AM-3 • NEW! Similar in design concept to the AM-5, this model has one woofer instead of two, and it features even smaller satellite speakers with one midrange/treble driver. **\$549.95 system**

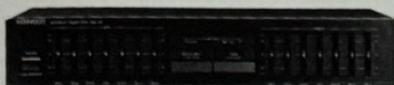

BOSE
Better sound through research.

3-piece speaker systems allow you to hide or place the subwoofer bass module out of your way and to put the satellite speakers on a bookshelf, or a like unobtrusive setting. They offer great sound with small size.

NHT(Now Hear This) offers a super value 3-piece system. Available in a piano gloss black this system features a dual woofer with integral passive crossover network. The satellites feature a true 2-way speaker with a wide dispersion dome tweeter **\$399.95 system**

BLACK BOXES

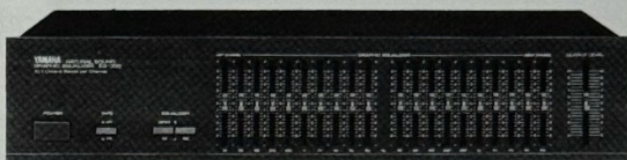

Kenwood GE-48 • modestly priced 7-band graphic equalizer with independent left/right channel adjustment, ± 10 dB range, tape source selector with indicators, EQ on/off switch, AC outlet. list \$100
NOW ONLY \$89.95

Vector Research VQ 115 • 10-band graphic equalizer with independent left/right channel adjustment, LED indicators, master EQ level w/peak LED meters. list \$150
NOW ONLY \$119.95

Audio Control Octave • This low-distortion, low-noise ten band equalizer was rated a Consumer Digest "Best Buy," and it is a winner of the Audio/Video International Grand Prix. It includes a subsonic filter and tape equalization circuit. Unlike many low-priced equalizers this will actually enhance an audio system. An outstanding value!
\$159.95

Yamaha EQ 330 • 10-band graphic equalizer with independent left/right channel adjustment, output level control, EQ recording, tape monitor, EQ on/defeat, and LED illuminated slide bars. **\$179.95**

Audio Control C 101 II • This is the top of the line, most elaborate analyzer/equalizer we can find! It is a premium 10-band equalizer and realtime analyzer in one unit. It includes an accurate pink noise generator and a laboratory grade measurement microphone on a 20 foot cord. **\$429.95**

Audio Control Phase Coupled Activator • This critically acclaimed device digitally reconstructs bass frequencies lost during the recording process. It returns the drama and impact – the feel – of a live concert. It includes a module programmable electronic crossover which can be used to drive subwoofers. A subsonic filter cleans-up program sources, and full video sound inputs and switching are included. "Unhesitatingly recommended" said HIGH FIDELITY MAGAZINE. **\$259.95**

We offer a variety of high quality speaker cables and interconnect cables from:

MONSTER CABLE

MIT

SIGNET

PHOENIX GOLD

ESOTERIC

Your wires and cables have a very important impact on the sound of your audio system. Poor wires and cables can affect the phasing of audio signals plus suppress dynamic range and frequency response. The audible result is lack of depth and detailing in the music and poor imaging. Spending a little extra in this area can reap big benefits.

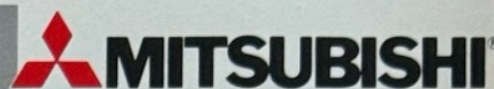

OVATION
AUDIO/VIDEO SPECIALISTS

The full sensory experience of the movie theater is now available in your living room. Mitsubishi has integrated thundering audio with dramatic big screen picture and professional quality videotape performance. Each audio and video component stands alone as a high performance unit. However, their real strength lies in the way they integrate with each other as a whole. The key to that integration is Mitsubishi's A/V receivers. They're centralized switchers that network each component in the system. Make a cassette from your favorite CD, program your VCR for an entire evening of programs while you're away, or switch to your favorite FM station.

- All with one remote.
- All with on-screen help (AV1, AV2).
- All from your easychair.

Mitsubishi MC 4100 • This 5-disc CD changer features oversampling, a 3-beam laser tracking system, anti-resonance chassis, and remote control. It allows you to sit back and enjoy music for hours at a time. It also features random play, elapsed time display and direct access to all tracks. list \$499.95 **NOW ONLY \$299.95**
SPECIAL PURCHASE

Mitsubishi M-AV 1 • Audio/video receiver with Dolby Surround and remote. Features 125 watts/ch in the front, 25 watts/ch for rear Dolby Surround. The remote is illuminated and controls most Mitsubishi audio, VCR, and TV functions. Settings, adjustments, and selections are all presented via on-screen menus (on TV) and operation displays (on receivers). This unit also features 4 audio/video inputs, 3 audio inputs, 1 video output and 2 switchable S-VHS inputs. It is both a video receiver designed for audiophiles and an audio receiver designed for videophiles. list \$1200 **NOW ONLY \$999.95**

Mitsubishi MAV 3 • A less powerful, less featured version of the M-AV1, this model is 80 watts/ch front and 20 watts/ch rear Dolby Surround. It still comes with a remote that operates most functions on Mitsubishi audio, VCR, and TV equipment, but the remote is non-illuminated. The receiver display screen is slightly more limited and there is no on-screen display. It has all the inputs and outputs, however, except for S-VHS. A great value on a true Dolby Surround receiver. list \$800 **NOW ONLY \$449.95**

Mitsubishi MT 5100 • high speed dubbing dual cassette deck offering both Dolby B&C, music search, auto-reverse on tape 1&2, continuous play, full-logic transport, remote control, and auto tape select. list \$400 **NOW ONLY \$350.00**

CS-3505R • 35" stereo monitor/receiver has a great picture with 700 lines of resolution, 196 function programmable remote with color temperature control, 10 watt per channel amp with graphic equalizer, subwoofer output and external speaker terminals, all in a distinctive black diamond gray finish cabinet. list \$2900 **NOW ONLY \$2599.95**

SUPERIOR SOUND

McIntosh[®] QUALITY

The McIntosh MCD 7007 Compact Disc Player moves performance to a new pinnacle of technological achievement producing the highest quality music reproduction. Every aspect of performance is improved: focusing and tracking, decoding, error correction, digital filtering, digital to analog conversion. Even with dirty or damaged discs, even when the player is bumped or knocked, the music retains its surpassing purity. The full integrity of the sound is preserved from the first readout of the compact disc straight through to the gold-plated connectors on the output.

"The unit's broad dynamic range, very low inter-modulation, and excellent transitory response enhances each of the orchestra's instruments in superbly-colored sounds."*

The value of all-integrated electronics is already well recognized. The advanced integration techniques in the MCD 7007 provide virtually all digital functions within the integrated circuits. Even the self-regulating and reference circuits are designed in the new VLS (very large scale) integrated circuit. You gain value because the VLS eliminates the need for factory adjustment. There is nothing to adjust so nothing can go out of adjustment assuring constant highest quality sound. You get very high standards of performance, consistency and reliability.

Demodulation, full-performance, error detection and correction and basic concealment of uncorrectable audio data are all performed in the VLS chip. This highly-advanced concept takes performance closer than ever to the theoretical maximum.

"Tone transcription, melodies, and accompaniments have a "spontaneous" beauty. Refined, transparent, and sumptuous are words that reflect the MCD 7007. - - - interwoven throughout is the famous "McIntosh" sound, which can be described as synonymous with power, dynamism, and flawlessness."*

DIGITAL TO ANALOG CONVERTER

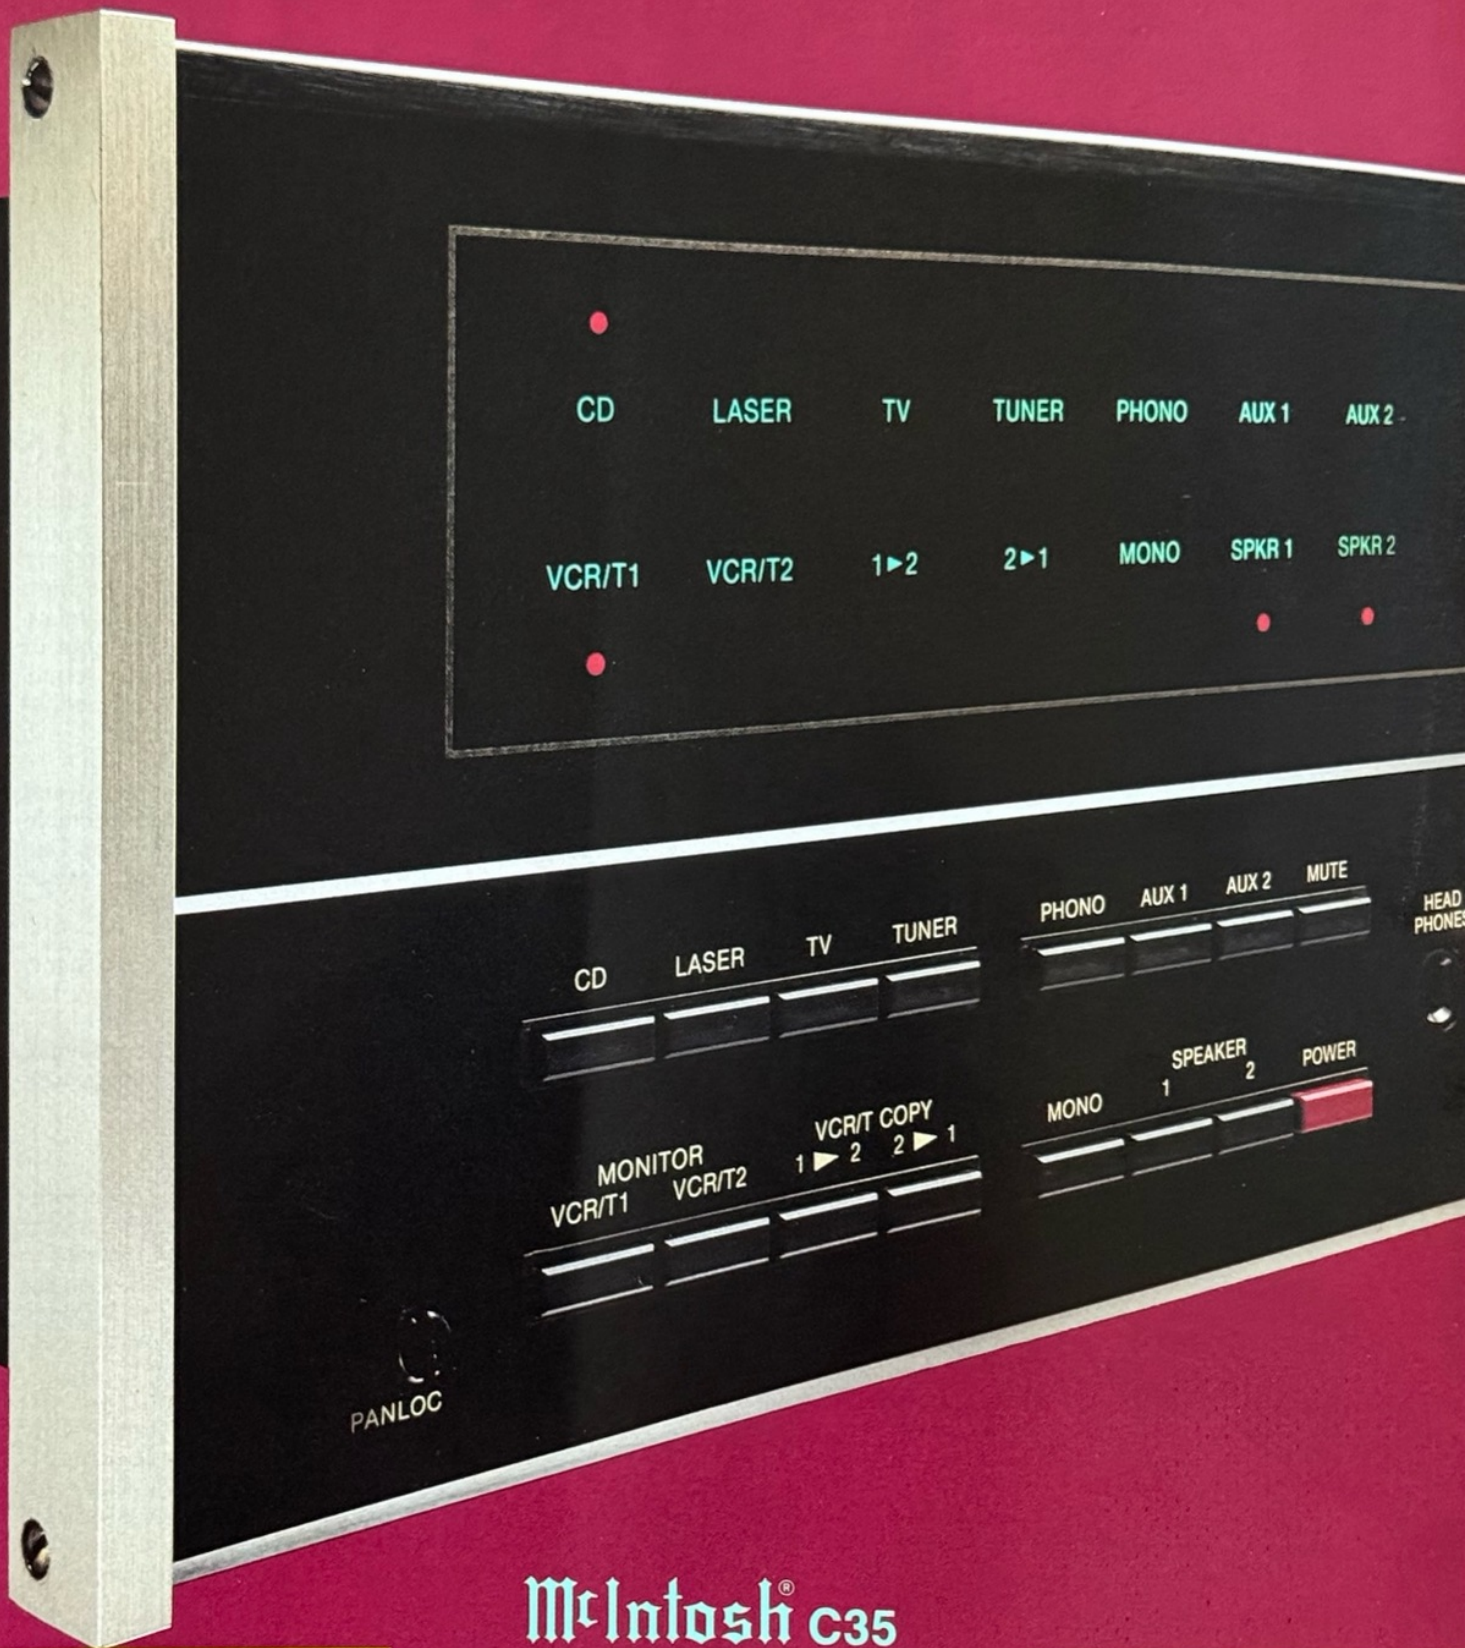

The digital to analog converter (DAC) has been completely redesigned. In conjunction with the improved digital filter, it has yielded important improvement in amplitude linearity, right down to the lowest signal levels. The performance selected McIntosh 'Golden Crown' DAC delivers the highest achievable performance.

"Truly, the McIntosh MCD 7007 Compact Disc player sets superlative new standards for musical purity and enjoyment. The massive effort of McIntosh engineers - - - allows us to discover a universe of sound in which the least subtleties of harmonic tonal structure and the smallest of range changes are heard in just the right places."*

McIntosh® C35
SYSTEM CONTROL CENTER

Handcrafted with pride in the United States

**Williston
Audio Labs**
Not for Resale

SUPERIOR SOUND McIntosh® QUALITY

The C35 System Control Center is an outstanding expression of McIntosh research into user desires consistent with high quality music reproduction.

- Engineering that is aggressively inquisitive in the search for better ways to bring these user dictated requirements to a technologically superior, innovative and clearly useful result.
- Appearance design that has long life, complements the living style, is complimentary to the owner, and is made of materials, whose characteristics permit 'a like new always' appearance.
- Easy to operate; The unique McIntosh designed panels are always easily readable in your choice of home

lighting. They are obviously designed by human beings for human beings.

- Manufactured of carefully specified and selected component parts that have high quality and long predicted life.
- Assembled by highly trained craftspeople who are dedicated to quality, accuracy and perfection.
- Thorough verification of the desired capabilities and quality of performance by constant and complete testing throughout the entire manufacturing process.

The McIntosh C35, above all others, will satisfy these requirements while it gives you the best sound, the most flexibility, and the greatest ease of use.

The C35 has many useful features to enhance your listening and video enjoyment. They include: High level inputs to accommodate the traditional as well as all the latest audio sources. Any one of nine input sources can be selected from the front panel or by the handheld IR remote. Electronic tape monitor switches for two audio tape recorders, or the audio from two video recorders, or one audio recorder and the audio from one video recorder, allow either recorder to be heard from the main output.

Volume is adjusted by a motor driven precision potentiometer. Left/right tracking accuracy is controlled to a fraction of a dB. Volume is displayed on the front panel by LED's which display the percentage of rotation of the volume control.

A five-band program equalizer permits the adjustment and improvement of the loudness contrast of five important frequency ranges. Musical balance of source material can be adjusted to compensate for room recording differences or listener preferences.

A built-in headphone amplifier provides power to the front panel headphone jack. All front panel controls are available to influence private listening on headphones.

McIntosh Engineering has carefully and expertly merged the many contributing elements into a superior quality, versatile and outstanding value, the McIntosh C35 System Control Center.

by dedicated, highly trained craftspeople.

McIntosh® MC 7270
DIGITAL DYNAMIC STEREO POWER AMPLIFIER

Handcrafted with pride in the United States

**Williston
Audio Labs**
Not for Resale

SUPERIOR SOUND McIntosh® QUALITY

The McIntosh MC 7270 power amplifier is designed to fulfill Digital Dynamic Range demands. It outperforms all competitors when listening to sound derived from digitally recorded tapes and compact discs.

"That a manufacturer can remain faithful to a certain listening style, to a "sound signature" recognizable by all through electronics even so different always astonishes. Such is the case of McIntosh where, in spite of the

change from tubes to transistors and from medium to high power, the basic McIntosh quality has not changed with the added benefit of an enormous reserve of power. Witness the MC 7270 for which this reserve of power sensation reaches almost the "colossal".*

The compact disc is capable of **real life dynamic** range while noise generated from compact discs is inaudible. With the noise restraint removed it is both easier and dramatically more enjoyable to listen to music at much louder levels. To fully enjoy this new capability your amplifier must be able to receive three to ten decibels of overstress from music, and it must do this without severely distorting the sound! This is the real world of Digital Dynamics demand. How to achieve the performance demanded, which often lasts from minutes to only a few thousandths of a second, and to achieve the goal economically, is a real achievement. Power Guard is that achievement.

"The Power Guard system is most effective in making it impossible to hardclip the output of the amplifier. Regardless of how hard it is driven, it simply cannot develop an audible amount of distortion on musical program material - - - . This feature should also mean a greatly reduced likelihood of blowing out a speaker, since clipping is a common cause of tweeter damage."**

McIntosh leadership in engineering has developed the Power Guard circuit which—(1) dynamically prevents power amplifiers from being overdriven into hard clipping—(2) assures that the amplifier will produce its maximum output without increased distortion—(3) protects your speaker from excessive heating. Power Guard is a patented McIntosh design (U.S. patent #4,048,573).

"The feeling of power is never refuted and instead of stunning the listener, the 7270 recreates an audio environment of a majesty that no other transistor amplifier is capable of reproducing as well."*

McIntosh®

Conceived in total dedication to the pursuit of excellence, the time required to develop the research program for this system has spanned at least two decades. The elusive combination of variables required to yield a uniform field has been tantalizing researchers for many years. Finally, after McIntosh built one of the most advanced and best instrumented acoustical laboratories in the world was it possible to follow the many theoretical leads to their conclusion. Then, after this extensive effort of analyzing so many different approaches to uniformity of field, was it possible to synthesize all of this knowledge and in one flash of intuitive genius the director of our acoustical laboratory saw a seemingly simple solution in the correct matching of diameters, masses and compliances and what evolved is a new measure of accuracy and realism. The intellectual and emotional experience of listening to the XR 1052 is something you simply must enjoy in your own home.

All Mitsubishi TVs have full square picture tubes for better clarity in the corners. All have high resolution black matrix tubes, stereo reception, integrated remotes (work with Mitsubishi VCRs).

CS-2720R • 27" stereo TV with 560 line resolution picture tube. This unit has extensive on-screen displays and a number of audio & video inputs/outputs including S-VHS input. It also features antenna A/B tuning and separate bass & treble controls. list \$899 **NOW ONLY \$799.95**

All Mitsubishi VCRs are packed with features and performance that are optional on some other brands. Programming is a breeze with on-screen directions and a two button approach. The first sets the start time, the second determines the recording duration. All Mitsubishi VCRs have FX 4 heads for jitter-free special effects.

HS-U80 Super VHS Hi-Fi VCR • The ultimate VHS VCR. The U80 brings professional video recording performance to your home. It offers features found on pro machines costing hundreds of dollars more. It has all the features you've come to expect from Mitsubishi plus digital special effects and a jog/shuttle dial which gives you total control of transport functions. It features the finest Super VHS performance on the market with several significant performance refinements. While it has 400 lines of resolution like other S-VHS machines, distortion and noise have been greatly reduced. Color accuracy and detail have been given a visible boost. It also has a host of digital features, among them picture in picture. list \$1900 **NOW ONLY \$1699.95**

HS-U61 • Everything the HS-U51 has plus Super VHS, which is THE home format for the 1990's in that it offers 400 lines of horizontal resolution versus 240 lines for standard VHS. This unit also incorporates (EP) Extended Play noise reduction which is useful in a S-VHS machine since it offers a much better picture to begin with. This machine also records and plays standard VHS, so for the price of a regular top of the line VCR you can get a product that will be good for the '90's. list \$999 **NOW ONLY \$899.95**

HS-U51 • This unit has Hi-Fi sound quality rivaling compact disc in its signal to noise specifications. It incorporates FX-4 heads for jitter-free special effects. It also has twin digital auto-tracking circuit which automatically adjusts tape tracking so that tapes made on various machines of different manufacture will always play perfectly on a Mitsubishi. list \$699 **NOW ONLY \$599.95**

MGA by Mitsubishi CS-2610 R • A 26" stereo monitor/receiver with remote. This set features 560 line horizontal resolution, a high contrast black matrix CRT, and comb filter, which all add up to a great picture. 181 channel tuning and audio/video inputs. list \$699 **NOW ONLY \$599.95**

MGA by Mitsubishi CS-2015R • a 20" stereo monitor/receiver with remote. This set features on-screen display of time, channel and A/V functions. It features a high resolution tube plus all the other features of the CS-2610R. list \$449 **NOW ONLY \$399.95**

Alpine 7168- This deck has all the features of the 7167 plus Dolby® B noise reduction, true preamp outputs, preamp fader, improved T 10 II tuner, auto-station memory (which automatically scans and presets the 6 strongest stations), and bi-level. list \$260 **NOW ONLY \$249.95**

Alpine 7269- This auto-reverse unit has a high power 16Wx2 amp, music sensor, Dolby® B, selectable fader, auto-memory, and all the standard features. **\$319.95**

ALPINE

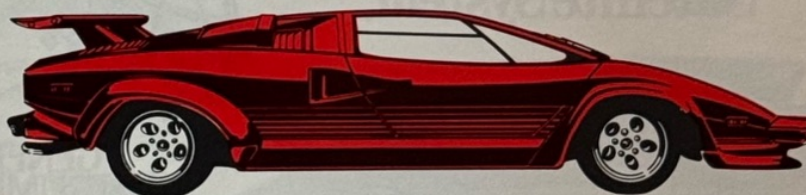

Sonic Excellence

Alpine 7380- This unit offers features & sonic performance previously only available on decks over \$500. Removable preamp only deck with dual preamp outputs that allow fading between two independent front and rear amplifiers...It also incorporates Dolby® B noise reuction, music search and HLTAC tape heads which have frequency response of 20-22 kHz +- 3dB. **\$349.95**

Alpine 7180 S- This auto-reverse cassette receiver has a removable chassis, 24 station presets, Dolby® B noise reduction, music search, separate bass & treble, digital clock, regular power (6 w/ch) and auto memory which automatically scans & presets the 6 strongest stations. list \$400 **NOW ONLY \$359.95**

Take this radio out for a drive. Then take it out.

Alpine 7280 S- This DIN type removable pull-out unit has a high power 16Wx2 amp, Dolby® B noise reduction, music search, and all the standard Alpine features. list \$450 **NOW ONLY \$399.95**

Alpine 5953- This compact disc changer controller can be surface mounted for easy control of the changer and can be removed to store out of sight. It offers preferred track memory that allows you to store up to 60 of your favorite tracks on any of the 12 magazines for recall. **\$249.95**

Alpine 7288- This removable tape deck also controls the CD Shuttle. It offers full logic GR mechanism, Dolby® B, 24 station presets, direct access presets for storing both FM and AM on one preset band, audio interrupt for use with Alpine's cellular phone, bi-level, and a 16wx2 amplifier. **\$499.95**

COMPACT disc DIGITAL AUDIO

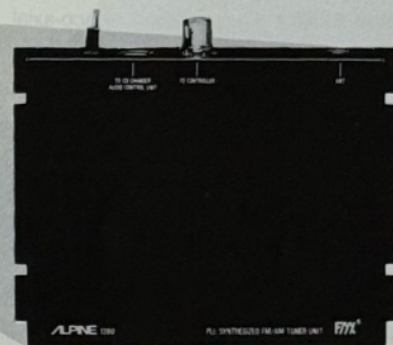

Alpine 7390- Alpine's flagship cassette deck. This unit is a removable CD Shuttle controller with full logic controls, HLTAC tape head, Dolby® B&C, new GR mechanism with soft loading, soft eject, auto-blank skip, repeat & scan, T 10 II tuner, 24 station presets, direct access presets, optic preset address, head cleaning mode, loudness, dual preamp outputs and more. **\$599.95**

The versatile **5952 CD Shuttle** Compact Disc Changer can be controlled by the new 7390 and 7288 tuner/cassette players. The 5953 Shuttle Remote Module also allows you to interface the Shuttle with existing stereos. The CD Shuttle, which holds up to six compact discs in one magazine, is the world's smallest CD changer. It can be mounted in the trunk—vertically or horizontally; or, it can fit under the seat and even in the glove compartment of many vehicles. The array of convenience features on the CD Shuttle include M.I.X. (random play), music scan, music sensor, repeat and pause.

Beyond convenience, the Shuttle delivers unrivaled sound quality. With a newly developed changer mechanism, the Shuttle is insulated from sudden shock and vibration, thus preventing the laser from mistracking during rough riding conditions. Plus, with a 16 bit, 4X oversampling digital filter and dual digital-to-analog converters, broadband noise is drastically reduced for ultra-clean sound. In addition, the Shuttle has separate power supply circuitry for audio and servo controls to further reduce noise interference from entering the system. **\$649.95**

Alpine 1390- Remote FMX/FM/AM tuner module for the CD Shuttle. This tuner is the first to incorporate FMX circuitry, which improves the signal-to-noise ratio of FM broadcasts by 14 dB and doubles the range in which full stereo can be received. **\$249.95**

Alpine 7903- Sophisticated CD player/tuner offers 16-bit 4X oversampling digital filter, dual D/A converters, random play function, scan, pause, automatic disc sensor, top of the line T 10 II tuner with 18 station presets, and a pull-out chassis. list \$650 **NOW ONLY \$549.95**

Alpine 5903- If you want a great CD player for your car, but don't need a radio, this unit is for you. All the features of the 7903 without the tuner. **\$499.95**

SPEAKERS

Alpine 6203 • NEW! affordable 6 1/2" 2-way coaxial car speaker system handles 60 watts. **\$89.95 pair**

Alpine 6256 • Alpine's best 5 1/4" co-axial speaker system handles high power and sports a dome tweeter for better dispersion. **\$109.95 pair**

Alpine 6205 • Digital ready 6"x9" 2-way car speaker system is one of our best-sellers. list \$140 **NOW ONLY \$125.00 pair**

Alpine 6398 • High efficiency 6"x9" 3-way car speaker system handles up to 90 watts. **\$159.95 pair**

Alpine 6368 • Performance Series 6 1/2" 3-way speaker system handles up to 90 watts. **\$159.95 pair**

CAR AMPLIFIERS & EQUALIZERS

Alpine 3216 • Expandable amplifier/7-band equalizer has a fadable rear pre-amp output and a 18Wx2 power rating. **\$129.95**

Alpine 3321 • Preamp/11-band equalizer with subwoofer outputs for the sophisticated system. **\$249.95**

Alpine 3552 • NEW! This versatile power amp can run your whole system. It features 4, 3 or 2 channel operation and a built-in dividing network for bi-amping. Rated at 30Wx4 or 85Wx2 power output. **\$369.95**

Alpine 3522 • This amp has Alpine's new Multimode Technology which allows the amplifier to power a pair of stereo tweeter/midrange satellites and one subwoofer simultaneously. Rated at 30 watts per channel. **\$149.95**

Alpine 3554 • NEW! Features multimode technology and all the features of the 3552, but with a higher power 50Wx4 or 150Wx2 amplifier. **\$479.95**

Alpine 6960 • Reference Series 6"x9" 2-way coaxial speaker system handles up to 150 watts and is Alpine's best-sounding 6"x9". It features a silk dome tweeter & a rubber surround for long life. **\$229.95 pair**

ALPINE
CAR AUDIO SYSTEMS

CAR ALARMS

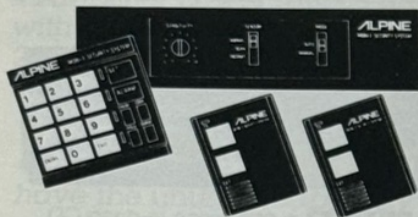

It is an unfortunate fact of life that many of us need security systems to protect our cars and our car stereos. Alpine, the leader in mobile electronics, offers a wide range of high value, high technology alarm systems. The models come with many features standard and also offer many upgrade features.

8030 • This mobile security system offers you an entry level, remote controlled system which has many features found on more expensive models. The 8030 system includes a main unit, a 1-button remote transmitter, 110 dB siren, an extension LED, glass breakage detector, and a disarm/valet switch. The unit allows you to program your door locks to lock after the last door is closed and the exit delay time has expired.

NOW ONLY \$199.95

Options: another remote transmitter, electronic impact sensor, digital motion sensor, hood locks, extra pins, extra extension LEDs.

8126 • All the features of the 8050 plus a computer servo motion sensor, a key pad interface, a selectable arming buzzer output (on/off), an optional audible armed status indicator, and a standby battery circuit/charger. **\$499.95** keypad optional

8051 • All the features of the 8030 plus a 116 dB siren, a superheterodyne receiver which is more sensitive and more reliable. The remote transmitter has 3 buttons which allow you more capability, including the ability to operate the systems of two different cars, plus control optional accessories such as a trunk opener or garage opener. list \$360
NOW ONLY \$299.95

8125 • The ultimate. This unit adds a pager with long range that tells you how your vehicle alarm has been triggered—glass breakage, motion, door entry, etc. **\$690.00**

Sony RM X1 • Basic CD changer controller. list \$150 **NOW ONLY \$129.95**

Sony RM X2 • Adds direct access to CDs plus tuner control. list \$270 **NOW ONLY \$229.95**

Sony XT 20 • AM/FM tuner with 20 station presets. list \$200 **NOW ONLY \$179.95**

Sony XR 6080 • AM/FM auto-reverse cassette with digital tuning & 18 station presets. Includes fader and clock. list \$210 **NOW ONLY \$149.95**

Sony XR 7050 • Auto-reverse cassette/receiver has digital tuning with auto memory, memory scan, 18 station presets, Dolby® B noise reduction, 25Wx2 high power amp with multi-fader and preamp output, and a slide-out anti-theft chassis. list \$380 **NOW ONLY \$299.95**

Sony XR 7280 • AM/FM auto-reverse cassette deck with Dolby® B&C, full-logic transport. It is removable and also controls the CDX A30 changer! 27 watts per channel in stereo or 9 watts in a 4-channel mode. list \$650 **NOW ONLY \$549.95**

Sony CDXR 77 • one piece in-dash CD player/tuner has 2X oversampling, plays 5" & 3" CDs and utilizes a silicon-charged anti-vibration system. The high performance tuner has 18 FM and 6 AM station presets. list \$650 **NOW ONLY \$449.95**
CDXR 79 pull-out version available @ \$499.95

AUDIO CONTROL

Audio Control EQL • Features 12 bands of equalization, 5 bands half octave bass (to give you better control of the frequency range most systems have problems in) and 7 bands octave for the rest of the frequency range. Probably the quietest car equalizer on the market @ -105 dB signal to noise. **\$199.95**

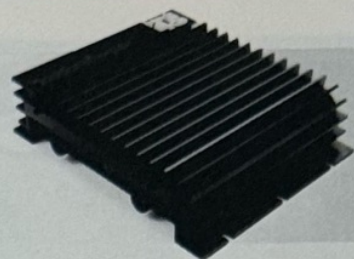

Audio Control Epicenter • Autosound bass restoration device uses patent pending logic controlled circuitry to detect low bass rolled off in recording and mastering. Then it digitally restores it in a way no other unit can, generating earthquake type results in your own car. **\$189.95**

Rockford Fosgate

The 1980's have witnessed the growing popularity of car stereo contests. One U.S. amplifier company has consistently dominated the competition: Rockford Fosgate. Every unit is burned-in for a minimum of 4 hours in a grueling series of tests designed to expose even the slightest weakness. The trademark of the Punch series has been hand-made, single piece power amps with built-in equalization and a high degree of reliability.

- Amplifier power ratings are with both channels driven from 20 Hz to 20,000 Hz at less than .05% THD into 4 ohms, less than .1% into 2 ohms or bridged.

- All Rockford Fosgate amplifiers have the unusual capability of running stereo and mono simultaneously with no additional adapters required, allowing for mono woofer, stereo midrange/tweeter system configurations.

Rockford Fosgate Punch 30 • entry level car amplifier has the same rugged dependability as the larger Rockford amps. Features MOSFET output devices.
15 watts continuous/channel @ 4 ohms
25 watts continuous/channel @ 2 ohms
\$179.95

Rockford Fosgate Punch 45 • The Punch 45 has built-in patented equalization, with variable bass & treble controls, is bridgeable and uses rugged MOSFET output devices.
22.5 watts continuous/channel @ 4 ohms
35 watts continuous/channel @ 2 ohms
70 watts bridged mono **\$249.00**

Rockford Fosgate Punch 75 • same as the Punch 45 only more powerful.
37.5 watts continuous/channel @ 4 ohms
60 watts continuous/channel @ 2 ohms
120 watts bridged mono **\$375.00**

Rockford Fosgate Punch 150 • same as above but even more powerful.
75 watts continuous/channel @ 4 ohms
90 watts continuous/channel @ 2 ohms
180 watts bridged mono **\$489.00**

Rockford Fosgate Power 300 Mosfet • As above but with 4, 3, or 2 channel operation. Includes built-in electronic crossover and a thermostatically controlled fan.
50 watts X4 @ 4 ohms
75 watts X4 @ 2 ohms
150 watts/channel in stereo. **\$950.00**

CAR SPEAKERS

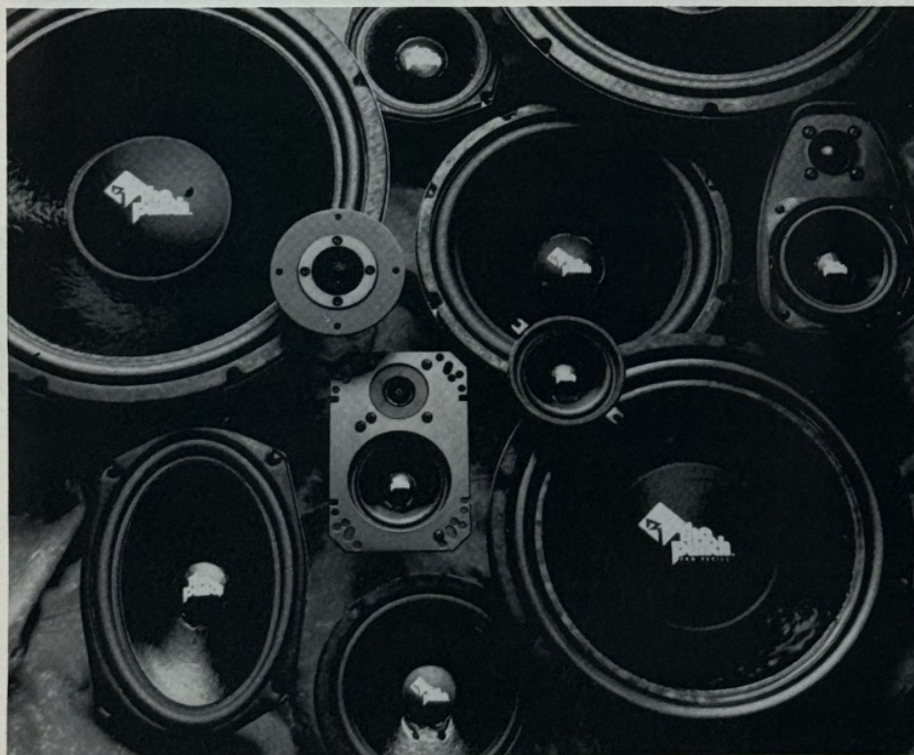

- Punch speakers take all the power that Rockford amps deliver. We carry a wide selection of their woofers, tweeters, and midranges. Rockford also offers a less expensive series and a Pro series.

Rockford Fosgate SP 34 • 3 1/2" midrange handles 50 watts. **\$74.00 pair**

Rockford Fosgate SP 84 • 8" car subwoofer can handle extraordinary volumes and power that car enthusiasts demand. You dish it out, and it'll take it! **\$95.00 each**

Rockford Fosgate SP 104 • 10" version of the the SP 84 subwoofer. **\$125.00 each**

Rockford Fosgate SP 415 • Incredible 15" subwoofer for the mega systems! **\$169.00 each**

polk audio

The Speaker Specialists®

Polk Audio has achieved its leadership position in the loudspeaker industry by totally dedicating itself to superiority in product, value, and service to its customers. Polk speakers have been favorably reviewed in both the stereo buff magazines and the general press. For example, *BUSINESS WEEK* said, "Polk Audio makes loudspeakers that audiophiles crave as much for their sound quality as their affordability. The speakers have won respect because of their ability to accurately reproduce complex musical passages." But don't take our word or anyone else's for Polk's performance - come in and listen - we think you'll like what you hear.

Polk MM 1 A • This is a 4" polymer coated dual cone full-range car speaker system. It can be used by itself or combined with other Polk speakers for a high performance system. **\$69.95 pair bulk**

Polk MM 4600 • 4"x6" dual cone car speaker system uses Polk's laminate polymer technology cone, high temperature voice coil, and high Gauss magnet to insure excellent clarity, reliability, and extremely high efficiency. **\$69.95 pair**

Polk MM III A • This coaxial car speaker system combines a 5 1/4" polymer laminate cone driver with a 3/4" wide dispersion high frequency radiator for outstanding performance. **\$139.95 pair**

Polk 6920 • This durable 6"x9" 2-way car speaker system uses polymer woofers with butyl rubber surrounds, plus dome tweeters with electronic protection. **\$189.95 pair**

Polk MM 6503 • 3-way 2-piece car speaker system uses a 6 1/2" woofer with the Ultramount mid/high frequency module. It offers improved bass response over the 5502. Handles up to 100 watts. **\$259.95 pair**

Polk MM 5503 • Same as the 6502 except it uses a 5 1/4" woofer. **\$239.95 pair**

Polk MM 6930 • The world's best sounding 6"x9" three-way car speaker system incorporates a new 2" polymer midrange and a 3/4" polymer dome tweeter. It is very efficient, has incredibly powerful well-defined bass, superbly smooth midrange and high end that rivals the finest home speakers. Handles up to 150 watts. **\$229.95 pair**

SOUNDSTREAM®

C A R A U D I O

Soundstream TC 303 • This outstanding deck combines European design with advanced technology and convenience. Has a high power low distortion stereo/4-channel amplifier and CD input, auto-azimuth adjustment, Dolby® B&C noise reduction, digital tuning with 12 presets, removable chassis. **\$399.95** handle optional @ \$19.95

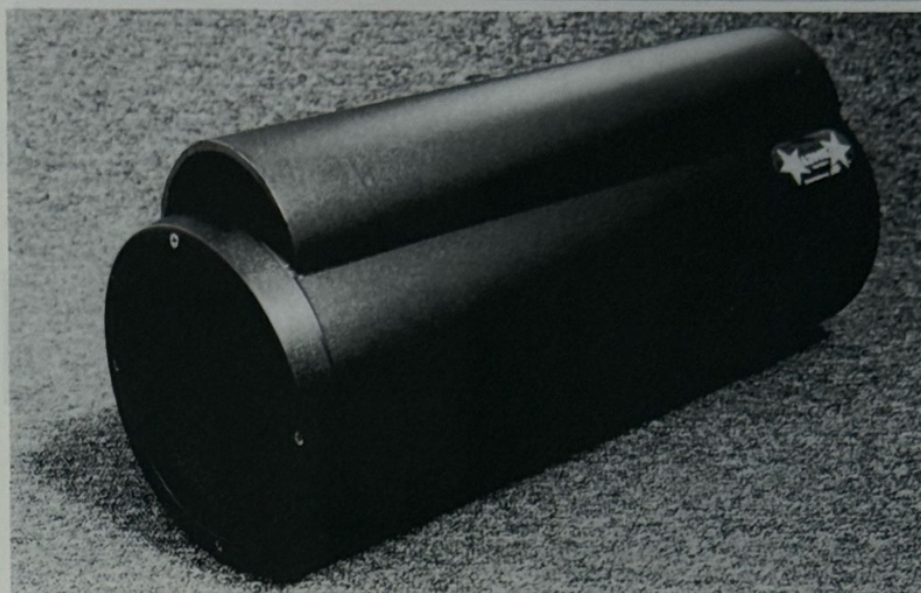

Soundstream TCA 40 • This is an auto-reverse cassette/receiver with premium performance and features at an affordable price. Dolby® B noise reduction, CD input, auto-azimuth adjustment, servo-controlled DC motor, amplifier section rated at a real 11 watts RMS per channel, digital tuning with 10 station presets, and the quality you have come to expect from Soundstream. **\$319.95**

Soundstream D 60 II • Dual channel 30 watt power amplifier is perfect for today's high-resolution car speakers. It offers plenty of headroom for smooth, clean performance. No detail is overlooked; from gold-plated RCA inputs, to shorting and overheating protection and safety fusing. **\$198.00**

Soundstream D 100 II • This award-winning amplifier offers 50 watts per channel into 4 ohms for powerful, clean sound. It's non-current limiting design gives it performance capabilities which rival home amplifiers. From gold-plated RCA inputs to top-notch design engineering, quality is inherent in this amp through and through. Manufactured in the U.S.A., it is rugged and reliable. **\$319.00**

The Bazooka Bass Tube speaker systems represent a revolutionary design breakthrough in car stereo bass units. The concept of "corner loading" is recognized by the audio industry as the most efficient means of delivering low frequencies. The Bazookas' patented tubular shaped enclosure uniquely applies this principle by focusing the entire output of the woofer into the corner. The result is phenomenally clean, dynamic bass that is unsurpassed by any other car stereo speaker system of equivalent size or price.

Bazooka SAS T62 • These efficient subwoofer tubes provide an incredible low end for your car stereo system. Two 6 1/2" woofers in a computer-aligned bass-reflex system designed to be corner loaded. Will fit in small pickups, hatchbacks, etc. **\$219.95 pair**

Bazooka SAS T 82 • For those who want a little more sound output and power handling. These 8" woofer tubes handle 150 watts per channel. **\$299.95 pair**

Bazooka T 102 • For those who have plenty of room & want ultimate bass response, this 10" subwoofer tube is it! **\$209.95 each**

MB QUART ELECTRONICS

MB Quart QM 218 • This speaker system uses a large 6 1/2" bass driver which produces deep bass down to 40Hz. It is housed in a non-magnetic, mechanically inert polymer housing that can withstand even the harshest automotive environment. The separate 3/4" titanium dome tweeter can be either surface or flush mounted, allowing installation that optimizes both stereo imaging and spectral accuracy. Ferrofluid cooling maintains power response even during high output musical passages. A compact frequency dividing network completes the package, tailoring individual driver output to precisely match driver response over the entire frequency range. **\$329.95 system**

MB Quart QM 215 • Like the QM 218 but with 5 1/4" woofer with only a 2" mounting depth, for installation into the tightest spaces. **\$289.95 system**

MB Quart QM 19 HC • Surface or flush mount titanium dome tweeter for fast extended high frequency response. Includes 12 dB/octave crossover. **\$129.95 pair**

MB Quart QM 130 • This speaker system is contained in a compact 5 1/4" unit, incorporating a high compliance woofer with a superb 3/4" titanium dome tweeter. The titanium dome produces an extended treble response that yields extremely fast transient response, and is ideal for digital audio sources such as CD and DAT. **\$199.95 pair**

AUDIO/VIDEO SPECIALISTS

FOR PEOPLE WHO THINK THEY HAVE EVERYTHING ...THINK AGAIN.

JVC

JVC RMS 1 • A universal programmable remote control (smart remote) that is actually easy to program and use. It features a touch sensitive LCD panel with menu-screens for 11 different sources - 2 VCRs, a videodisc player, a TV, a CD player, a DAT deck, a conventional cassette deck, a tuner, a turntable, an auxiliary component and a utility unit. The RMS 1 can learn up to 200 remote control codes. If you have too many remotes, this is a necessity! list \$250 **NOW ONLY \$199.95**

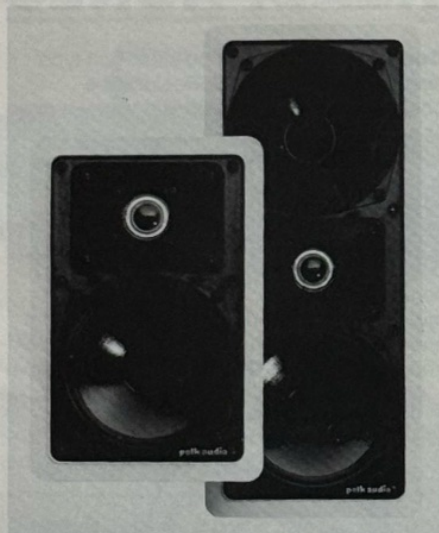

Velodyne ULD-15 • One of the ultimate subwoofers! This 15 inch woofer features a built-in 400 watt amplifier with Velodyne's patented High Gain Servo technology. This is a system which uses motional feedback (a controller modifies the signal from the amp to the speaker so that the acoustical output from the speaker is a true representation of the input). This results in flat frequency response (to 15 Hz +/- .1 db) and extremely low total harmonic distortion. **\$1795.00**

Yamaha AST C10 • The best portable audio system made. Includes digital AM/FM tuner with 10 presets, a CD player with direct access and 20-track programming, dual cassette decks with Dolby B & auto-reverse playback (A,B) and recording (B). The amp has 24 watts/ch and the detachable speakers feature Yamaha's YST technology for great bass reproduction out of small cabinets. Includes a 35 key remote control and a timer with sleep function. **NOW ONLY \$999.95**

Stax Lambda Pros • Electrostatic headphones have a transparent effortless sound quality that will take your breath away. It has been reviewed as the world's finest headphone system by leading audiophile magazines. Worth listening to just to see how good home sound can be. **\$749.95**

Polk AB 7 • This compact unit uses the same high quality components as Polk's other loudspeakers, but this speaker is flush mounted in a wall. With one silver coil dome tweeter and one 6 1/2" bass-midrange driver, this is the perfect speaker for non-obtrusive home installations. The grilles are easily spray painted to match any decor. list \$400 **NOW ONLY \$350.00 pair**

Polk AB 800 • Similar to the AB 7, but with two 6 1/2" bass-midrange drivers for much more authoritative bass. list \$600 **NOW ONLY \$499.95 pair**

Niles SC-W1 • A high quality wall-mounted stereo volume control for remote speakers. With this and a pair of speakers you can listen to your stereo all over your house while individuals in different rooms can adjust the volume in their respective rooms. **\$49.95**

Lexicon CP 1 • Digital Audio Environment Processor with remote control. The CP-1 takes the finest audio and video systems beyond reproduction and into recreation of the original event: including the authentic spatial context for a live, realistic sound. The CP-1's Surround programs bring movie soundtracks to life. The Dolby Pro Logic matrix uses all-digital processing - a Lexicon exclusive - for vivid, lifelike sound effects without smeared dialog or drifting background music. Stereo Logic turns music or stereo TV into a theater-size experience. Mono Logic's spatial generation enhances the soundtracks of the many excellent films available only in mono. With a CP-1, your surround sound amplifier and speakers won't go to waste when the program material doesn't take them into account. **NOW ONLY \$1295.00**

CUSTOM INSTALLATIONS

These pictures reflect a few of the installations we have done in homes. If you think you have everything ask yourself, "Can I play multiple sources of my stereo in multiple rooms all over my house with independent control of volume and source by room?" If the answer is no, we will be glad to sit down with you and explain how to best do a system like that in your home. We can do both new and existing homes in this manner.

We'd also like to demonstrate a true Dolby surround system for you. This is one of the most exciting concepts in audio/video today. You can have better than movie theatre sound in your own home. For those of you who either buy or rent movies, you must hear this!

One nice option we now have with excellent equipment is to display it in many different ways. We can use cabinetry like in this page or pp 2-3; we can use in-wall speakers and in-floor subwoofers like on page 38; or we can use large speakers like on pp 15,16,17. In short, the equipment can be as impressive or as quietly elegant as you desire.
